

Edit your videos using Claude Code.

The reels, vlogs, and promos we ship all start as one prompt. This is the index to the whole library — 17 video-editing skills, each a complete master prompt you paste into Claude Code and run. Below: what each one does, plus one full prompt to try right now.

★ 90/100 critic-pass — bali nomad vlog

The 17 skills

- 01 Cinematic Reel**
One scenic clip → graded, beat-snapped 9:16.
- 02 Pro Short-Form (saddamh1)**
Talking-head advice reel from a script.
- 03 Kinetic-Caption VO Vlog**
Your voice + gold word-highlight captions.
- 04 Branded Proof Reel**
Interview + output clip → on-brand reel.
- 05 Comment-Bait Reel**
"Comment X for the link" lead-magnet reel.
- 06 Branded Demo Promo**
Screen-rec → hook + strap + VO promo.
- 07 Vlog Cut**
A folder of clips → one finished vlog.
- 08 Easton Punch Captions**
One-word punch caption style.
- 09 Faceless Explainer**
Text → video, no camera needed.
- 10 Motion Graphics Hit**
UI chips, halos, animated overlays.
- 11 Embedded / VFX Captions**
Captions baked + composited as alpha.
- 12 Graphic Overlay Pack**
Lower-thirds, straps, chip strips.
- 13 Product Launch Video**
Feature reveal, launch-day cut.
- 14 PR-to-Video Changelog**
Ship notes → a video changelog.
- 15 Website-to-Video**
A landing page → a promo video.
- 16 General Video (freeform)**
Open-ended editing, your direction.
- 17 GHL Video Drip Scheduler**
Render once → schedule across socials.

One full prompt — Cinematic Reel

PASTE INTO CLAUDE CODE

Cinematic Reel

You are my video editor. Turn the single landscape clip at `[PATH]` into a polished vertical 9:16 cinematic reel.

Do it in ONE ffmpeg pass (try NVENC h264_nvenc; if it errors, fall back to libx264 -crf 18):

1. Scale + center-crop 1920x1080 → 1080x1920.
2. Color grade: lift contrast ~1.06, saturation ~1.1, gentle teal-orange. Subtle vignette.
3. Speed-ramp the dead air out; keep the strongest 18-22s.
4. Beat-snap 2-3 title cards (Fraunces font, cream #f7f1e8 text) at the natural cuts. Card 1 = the hook line I give you.
5. Bake a cover frame at 00:00 so socials grab the thumbnail.

Output: `reel_9x16.mp4` + a 22s alt cut. Show me the ffmpeg command before rendering, then run it and report the file path.

Hook line: `[YOUR HOOK]`
