NODE://AUDIT

The Automation Audit

5 steps. Any business. 60 minutes.

SWIPE →

NODE://WHY

Most 'automation consultants' guess.

We use a 5-step audit that finds $5k+ of savings EVERY time.
Here it is — free.

15 MIN

01

STEP 1 — MAP

List the top 5 repeated tasks.
Ask: 'what do you do every Monday morning?'

10 MIN

02

STEP 2 — TIME

Estimate hours/week for each task.
Multiply by hourly rate → real $ value.

03

STEP 3 — RULE

Can it be described with rules?
If yes → automate. If 'it depends' → leave it.

04

STEP 4 — STACK

Match to tools: n8n, Zapier, Make, Claude.
80% of tasks = n8n + 1 API.

DO NOT SKIP

05

STEP 5 — SHIP

Build the lowest-risk one FIRST.
Prove it works. Then scale.

$8.2k

Average monthly savings
from one audit (our last 12 clients)

RULE

06

THE ROOKIE MISTAKE

Trying to automate judgment.
Automate the boring. Keep the human in the loop.

RECAP

THE 5 STEPS

- MAP → list tasks
- TIME → measure $
- RULE → can it be described
- STACK → match tools
- SHIP → build 1, prove it
