NODE://PROMPT

20 AI Agent Prompts

...that actually work in production

SWIPE →

NODE://REAL

Most 'prompt engineering' is garbage.

These 20 run live in paying-client systems.
Stolen from our agency's private stash.

SDR

01

LEAD QUALIFIER

'You are an SDR. Score this lead 1-10 based on ICP match. Respond ONLY with JSON.'

INBOX

02

EMAIL TRIAGER

'Classify this email as: urgent / reply / archive / spam. Respond with ONE word.'

NOTES

03

MEETING SUMMARIZER

'Summarize this transcript as 3 bullets + 3 action items + 1 risk.'

04

CONTENT RECYCLER

'Turn this blog post into 5 LinkedIn posts. Hook first. <200 words each.'

SUPPORT

05

SUPPORT TRIAGER

'Tag this ticket: bug / feature / billing / refund. Respond with ONE tag.'

07

THE PATTERN

1. Role
2. Task
3. Output format
4. One-word answer if possible

94%

Classification accuracy on production
(Claude 4.6, temperature 0)

RECAP

RULES THAT STICK

- Always specify output format
- Force JSON or one-word answers
- Set temperature to 0 for classifiers
- Never trust 'creative' in production
