The $10K/mo Agency OS

Built from 7 years of expensive mistakes

SWIPE →

Most agencies die at $5K/mo.

Not from lack of leads.
From lack of SYSTEMS.
This is the OS that broke the ceiling.

THE OFFER

ONE service. ONE niche. ONE outcome.
Not 'web design'. 'Luxury realtor sites that convert 3x'.

II

THE PIPELINE

1 outbound channel + 1 inbound channel.
Master both before adding a 3rd.

III

THE DELIVERY

SOPs + templates + automation.
If you can't onboard a new client in 24h, you don't have an OS.

IV

THE PRICING

Min $3K project or $1K retainer.
Below this = you're paying to work.

V

THE WEEK

Mon: pipeline
Tue-Thu: delivery
Fri: review + admin

VI

THE METRICS

Track 3: Leads/week, Close rate, Cash collected.
Nothing else matters at $10K.

$11,400

Our first month at this system.
(From $2,800 the month before)
