DATA://01

90% of AI Agencies

...will die in 2026. Here's why.

SWIPE →

DATA://CTX

15,000 'AI agencies' launched in 2025.

Most are GPT wrappers with a logo.
The data is brutal.

87%

of AI agencies founded in 2025
had <$500 MRR by Q1 2026

DEAD

01

REASON 1 — NO MOAT

Reselling ChatGPT isn't a business.
It's a Chrome extension with overhead.

02

REASON 2 — PRICE WAR

Fiverr has 900 'AI agents' at $5.
If your pricing competes, you lose.

03

REASON 3 — NO DELIVERY SYSTEM

They sold AI but built MVPs.
No SOPs. No scale. No retention.

0 → $10

Gap between 'demo works' and 'client pays'
is where 90% die

04

WHO SURVIVES

Niche specialists.
Real engineers, not prompters.
People who ship in weeks, not months.

05

WHAT TO DO

Pick a niche.
Build a real system.
Charge for outcomes, not outputs.

RECAP

THE HARSH TRUTH

- AI agency ≠ AI business
- Wrapper ≠ moat
- Demo ≠ product
- Price war → death
- Specialize or die

DATA://END

AM I WRONG?

Prove it in the comments.
Show me your MRR.
I'll update the data.
