CASE #002

'How do people charge $50K?'

Here's the exact project.
Exact deliverables. Exact price justification.

01

THE CLIENT

Mid-size logistics company.
Drowning in manual ops. 8-person back office.

PAIN = $

CASE #004

02

THE PROBLEM

2,400 orders/month processed by hand.
40% error rate. $200K/year in recovery costs.

BUILD

CASE #004

03

THE DELIVERABLE

n8n workflow + Claude API + dashboard.
Auto-classifies, routes, enters data.

VALUE-BASED

CASE #004

04

THE PRICE

$50K one-time.
$2K/mo maintenance retainer.
Client saved $200K ☐ easy yes.

05

THE TIMELINE

Week 1: audit + scope
Week 2-3: build
Week 4: train + handover

REAL

CASE #004

06

THE STACK

n8n (self-hosted) · Claude API · Supabase · Retool dashboard · Slack alerts

ROI 3.6X

CASE #004

07

THE RESULT

97% accuracy.
$180K/year saved in Q1.
Contract renewed 2x.

CASE #005

$50K

Paid once.
$200K saved. Every year. Forever.

THE MODEL

- Find a $ bleeding process
- Price as % of the bleed
- Ship in weeks, not months
- Retain on maintenance
- Reference □ next $50K deal
