CASE #001

100 websites built.

10 lessons I wish I knew at #1.

CASE · CTX

CASE #002

I've built 100+ websites over 7 years.

Here are the non-obvious lessons.
Nothing in here is on YouTube.

TRUTH

CASE #004

01

LESSON 1

The homepage is a lie.
Most traffic lands on sub-pages. Design those first.

REFRAME

CASE #004

02

LESSON 2

Clients hate 'design'.
They want trust signals + clarity.
Beauty is 3rd.

SPEED

CASE #004

03

LESSON 3

Shipping ugly > perfecting pretty.
A live website earns. A Figma file doesn't.

CASE #004

04

LESSON 4

Never let clients write copy.
Ask questions. Transcribe answers. YOU write.

05

LESSON 5

Stock photos = trust killer.
Use real photos, even bad ones.

MOBILE

CASE #004

06

LESSON 6

Mobile-first is dead.
Mobile-ONLY is alive.
72% of visits. Design for it.

PERF

CASE #004

07

LESSON 7

Page speed beats everything.
A slow 'stunning' site loses to a fast ugly one.

08

LESSON 8

Contact form = revenue leak.
Use a calendar, WhatsApp, or direct DM.

RECAP

CASE #009

THE META-LESSON

- **Websites are sales assets, not art**
- **Trust > beauty**
- **Speed > features**
- **Ship > polish**
- **Every website = a revenue machine in disguise**

CASE #010

WHICH LESSON HIT HARDEST?

Drop the number in the comments.
I'll share the deep-dive.
