· TRUTH ·

'Grind 100 hours' is killing founders.

Here's what actually keeps you sharp for 10 years. Not 10 months.

NEUROSCIENCE

01

SLEEP IS STRATEGY

7-8 hours non-negotiable.
Every hour below = 1 IQ point off your decisions.

FREE

02

MORNING SUN

10 min sunlight before screens.
Sets cortisol rhythm for the whole day.

DEFENSE

03

NO PHONE MORNINGS

First hour = yours.
Not notifications. Not Slack. Not X.

04

MOVE DAILY

Walk · lift · swim · anything.
20 min moves your brain out of loops.

HUMAN

05

ONE FRIEND

One person who knows your real numbers.
And your real fears.
Isolation kills founders.

06

REST GUILT-FREE

Rest isn't lazy.
Rest is how compounding works.
Founders who rest outlast founders who grind.

EARLY WARNING

07

TRACK 3 THINGS

Sleep · mood · energy.
If all 3 drop → stop everything. Reset.

The goal isn't to burn bright.
It's to burn long.

— Agency lesson, learned the hard way
