7 Books Every

AI agency owner should read (not the usual ones)

SWIPE →

· WHY ·

Everyone recommends '$100M Offers'.

Here are 7 books almost nobody reads.
They'll change how you build.

SYSTEMS

01

THE E-MYTH

Michael Gerber.
Why most founders are technicians trapped in their own business.

02

OBVIOUSLY AWESOME

April Dunford.
The book on positioning your AI agency.

OPS

03

THE GREAT CEO WITHIN

Matt Mochary.
Operating manual for founders. Unreasonably tactical.

04

THE DIP

Seth Godin.
How to know when to quit.
More valuable than 'never give up'.

MENTAL

05

THE ALMANACK OF NAVAL

Eric Jorgenson.
Leverage, wealth, peace.
Better than any productivity book.

CLASSIC

06

HIGH OUTPUT MANAGEMENT

Andy Grove.
The only management book that aged well.

07

COMPANY OF ONE

Paul Jarvis.
The case for staying small and profitable.

Readers become leaders.
But only if they apply ONE idea.

— stolen from somewhere smart

RECAP

THE RULE

- 1 book per month, max
- Apply 1 idea per book
- Re-read the best ones
- Books compound. Feeds don't.
- The quiet founder out-reads the loud one
